TECHNOLOGY

The Push Chain 02 and Push Chain 03 stage lifts are smaller sized lifts specifically designed for seamless integration into various types of stages and setups, making it an ideal choice for theaters, concert halls and event spaces seeking to enhance their stage dynamics. Fluent and quiet vertical motion is guaranteed for performers as well as equipment. The PC02 and PC03 lifts can be quickly set up in formation and their exceptionally smooth and precise operation makes it possible to create beautifully synchronized wave and other creative effects.

MAIN FEATURES

COMPACT DESIGN
RELIABLE
SIMPLE OPERATION

MINIMAL MAINTENANCE
CONTROLLABLE WITH MM PRECISION
EASY TO INSTALL

- Integrates in our WIMOTION platform
- Compatible with any other motion control gear from rental stock
- Simple operation with a handheld remote or control panel

WICREATIONS

With WICREATIONS founded by Hans Willems in 2005, we are a world player in entertainment engineering, motion control, scenic and staging solutions for the live event sector. Our portfolio includes 250+ national and international shows, tours, festivals, theme parks, television and film productions, fashion events, sports and corporate shows. Amongst our clients we can count the biggest bands on earth such as The Rolling Stones, Rammstein, Ed Sheeran as well as local heroes and DJ's.

CORE BUSINESS

Prime motion technologies that create unique and spectacular upper and lower stage effects. A wide range of integrated systems and structures such as stage elevators, fly winches, moving hoists, tracking systems, turn tables and rotators are also available either on a rental base or complemented with custom fabricated elements, all of these operated via WIMOTION, our proprietary stage motion control system.

During the pandemic we further developed the WIMOTION ecosystem: a 360° cloud solution for all motion elements of a project aimed at facilitating pre-show collaboration and feedback thanks to realtime previsualization.

We combine passion for the entertainment industry with an unwise addiction to tech and a stubborn focus on always delivering the best solution ever.
